Worldwide**

Seminars RMG by Honeywell Germany at a Glance

The operation with gas pressure regulating and metering systems/safety devices requires a thorough knowledge of the functional components within the systems.

- **Basics:** Product-overview, technical data, design, operation and maintenance
- **Special Regulators:** Direct acting, auxiliary and pilot controlled regulators, customized designs
- **Systems:** Automation and odourizing systems, underground modules
- **Metering:** Gas measurement and analysis technology.

In Germany we offer standard practical courses of gas pressure regulation in Kassel and metering systems in Butzbach and Ebersberg several times during the year.

General Information

RMG by Honeywell provides its customers with updates of product development and revised technical leaflets with reference to the type of training as follows

- general description,
- operating instructions/maintenance/spare parts and furthermore
 - the RMG booklet which contains the complete product range of the RMG worldwide
 - the RMG homepage www.rmg.com that provides customers with a wide download area and tools for choosing regulators and calculating flow rates
 - the brochure Training gives detailed information about seminar types, rates, course duration and time schedule.

Training Rates Regulators:

The price of two-day seminars is 465,-€ per person. A one-day training is 308,-€ per person. Customized in-house and onsite training is available on request.
