

RMG Messtechnik GmbH is a global partner in the gas business, has more than 150 years of experience in the natural gas industry and offers its customers competence in all applications in natural gas measurement. Our market-leading products include ultrasonic and turbine wheel gas meters, volume reversers, gas analyzers and device management software. For plant planning, our customers benefit from tailor-made solutions and systems and our many years of experience in the industry. We differentiate ourselves through innovative technological solutions and unique service.

Do you enjoy direct contact with customers and you are fascinated by innovative environmentally friendly technologies? Then we look forward to receiving your application as a

**Service Technician/Service Engineer (m/f/d)  
in our Field Service - Region East  
(Brandenburg, Saxony-Anhalt, Saxony)**

For customers in your region, you independently take over commissioning/maintenance and service activities in the field of gas measurement technology. You train your customers in the device technology and create the service reports and evaluations. In close coordination and cooperation with the internal service and the sales organization, you ensure that our customers receive first-class solutions and services.

In addition to the enthusiasm for the business and a strong quality awareness, you need a degree as a technician/master electrical engineering or mechatronics technician. Alternatively you have completed a degree in electrical engineering/ mechatronics/ environmental technology. Good MS-Office, good knowledge of German and English in word and writing as well as a class B driving license are prerequisites. Professional experience in the field of service would be an advantage.

As part of your induction, we will provide you with the necessary knowledge in the field of measurement technology and data transmission systems (BUS systems). You will get to know all departments, and for official calibration service activities in your region we will train you as deputy head of the official calibration service department.

An open and sympathetic working atmosphere with modern working conditions (e.g. flexible working hours) awaits you. Flat hierarchies and short decision-making paths give you the opportunity to realize yourself and actively contribute to projects. For your work, we provide you with a company car, which can also be used privately.

Please send your relevant application documents incl. salary request and earliest possible start date preferably by e-mail to: [recruiting@rmg.com](mailto:recruiting@rmg.com).

If you have any questions, please contact Gudrun Ernst on 06033/897351.
